MAKING

OUT

IN

JAPANESE

From everyday conversation to the
language of love—a guide to
Japanese as it's really spoken!

by Todd & Erika Geers
revised by Glen McCabe

Learn to speak the colloquial language the Japanese really use with *More Making Out in Japanese*. This classic phrase book has now been completely revised to be even more helpful as a guide to the modern Japanese spoken in everyday interactions—giving access to colorful expressions not covered in other phrase books.

More Making Out in Japanese features a pronunciation guide, notes on Japanese language and culture, and a guide to male and female usage. The phrases are organized according to typical encounters, including:

- * Making acquaintances
- * Discussing likes and dislikes
- * Sharing a meal
- * Going out on the town
- * Developing a romantic relationship

In addition to the romaji forms of phrases, each expression is also presented in Japanese script so that you can show the book to the person you are speaking to. *More Making Out in Japanese* will bring you to a new level of fluency and communication in Japanese!

Introduction

So no one understands your Japanese? Worse yet, you don't understand theirs. You've planned your Saturday night, spent a week studying one phrase, and you can't wait to use it. You're at a club, armed with the latest edition of Learn Japanese in 27-and-a-1/2-Minutes-a-Day for moral support, and you lay the phrase on that good-looking local. What happens? The response isn't like in the book. Why?

Basically, because the Japanese don't play by the book when it comes to their daily language, just as Westerners don't. So what can you do? Well, you could give up and decimate your chances of getting with anybody, or you could learn to speak real Japanese.

Just as we speak in a relaxed, colloquial manner, so do the Japanese. On trains, in bars, during ball games, or when getting intimate with their partners, they all use shortcuts—it's only natural! If you want to talk the way the Japanese do, then you need to know what to say, how to say it, and when to say it.

And better still, you'll need to know the cultural context it all happens in. We've built in lots of little morsels to help you paint a picture of the real Japan as you go along—this book will be your roadmap on the path to love and satisfaction in Japan! Right then? Okay, let's go!

INFORMATION

It's tricky to teach the proper pronunciation of a foreign language in a book, so we're not going to try, hoping you've already got the basics. To help you out, though, we've joined two and sometimes three or four words together, to make compound words or phrases that are easier to pronounce. Most of them are hyphenated to highlight merged words, to emphasize the slang suffixes and particles, and to facilitate pronunciation and memorization.

For example, the components of **fuzakenaide-yo** (ふざけないでよ) are: **fuzake** (from **fuzakeru**), **naide** (command form of **arimasen**), and the (quite forceful) suffix **-yo**. We've written the compound phrase **fuzakenaide-yo** so that you won't pause while pronouncing it, but say it entirely in one breath; a pause would weaken the impact.

We're sure that you're familiar with the polite question forms **des-ka** ですか and **mas-ka** ますか. Forget them. Except for a few needed for talking to strangers, requesting services, etc., the rest have been dismissed. In informal speech, rising intonation takes the place of these forms. Thus, the final syllables of all words and phrases in this book ending with a question mark should be pronounced with the kind of rising intonation you give to the question "Right?"

Slang that is too faddish is not included in this book, because it comes and goes too quickly. If you use old slang, the reaction of your Japanese date will likely be, "He thinks he's being cool but nobody says that anymore. Hah, hah!" So we've avoided hot slang—if it's out of date people will think that you're funny or square. But feel free to use what you pick up on the street.

VARIATIONS

The terms “boy” and “girl” are used throughout the book, but we’re definitely referring to the post-puberty phase here. To eliminate the embarrassing problem of boys using girls’ words or vice versa, we’ve indicated words suitable for use by girls and boys with the symbols ♀ and ♂ respectively. Words and phrases not marked can be used by both sexes, and (b→g) means a boy should use it when talking to a girl. For example:

Don’t be upset.

Okoranaide. ♀
おこ
怒らないで。

Okoruna-yo. ♂
おこ
怒るなよ。

Make me warm.

Atatamete.
あたた
暖めて。

You look beautiful.

Kirei-dayo. (b→g)
きれいだよ。

But before you go thinking that boys’ and girls’ speech patterns are absolutely divided, stop a minute. Don’t be shocked if you hear a girl using a quite masculine phrase (or vice versa). The gender gap in Japanese speech is narrowing, especially among young people, and there’s nothing wrong with “borrowing” for impact or emphasis. We’ve made the distinction as a general guide to usage.

One thing you’ll notice as you speak with the Japanese (especially if you move around) is that people’s speech patterns vary wildly. We’re not just talking about slang here, there are also big differences between regions and social groups. It’s impossible for us to include all the variations (more on the regional ones later) of the phrases in this book, so we’ve gone with a standard Japanese (**hyōjungo** ひょうじゅんご 標準語) style, which everyone will understand and which you can adapt to the area you’re living in.

Adaptation is really important—the phrases here might seem too harsh to some ears and too soft to others. Take your cues from the speech and reactions of people around you. If they warm up to the way you’re talking, great, otherwise think about the way they’re taking it and adjust. If all else fails, ask—foreigners aren’t expected to know everything!

JAPANESE-ENGLISH-JAPANESE

You’ll have seen above that we’ve written Japanese phrases in two ways—in **Rōmaji** (ローマ字—Western script, with lines above some vowels meaning long sounds) and in Japanese script with **furigana** (phonetic **hiragana** ひらがな 平仮名 above the Chinese **kanji** かんじ 漢字) for an added challenge as you get better. But many phrases are written in another phonetic alphabet, **katakana** カタカナ 片仮名. **Katakana** are mostly used for foreign words, and there are many of them in this book—for example, “batteries” are **batterii** バッテリー. Among other things, they’re also used to write a few Japanese superlatives, such as **chō** チョー (amazing-ly/fantastic-ally).

When using **katakana**, life gets a bit tricky when you hit the limitations of the Japanese language. It has only one final consonant “n,” so when the Japanese pronounce English words with other consonant endings, they have to tack on a vowel, usually a “u.” “Game” becomes **gēmu** ゲーム, “bed” becomes **beddo** ベッド, etc. With no final *r* sound, they usually use a long *a*—for example locker becomes **rokkā** ロッカー. And since there is no *l* sound at all, *r* is used instead.

There are few sounds that the Japanese can pronounce, so they’ve created new ways of writing them. A “we” (as in “web”) is written ウェ, and *v* sounds are written as ヴ followed by a **katakana** vowel, as in **va** ヴァ, **vi** ヴィ etc.—though the ability to pronounce the *v* varies greatly, especially between generations!

The Japanese enjoy scattering English words in their speech and you should do the same. With a little practice, it's easy to get the hang of how to "katakana-ize" an English word, that is, to pronounce it the way a Japanese would, strange as it might seem at first. As a foreigner, you'd be expected to use **katakana** words—so don't hold back!

As a reference point, here's a chart of the 45 **kana** in each alphabet, with the **hiragana** listed first under each sound. There are various ways of writing some **kana** in **Rōmaji** (e.g. **tu** or **tsu**)—we've gone with those closest to the sound.

a あア	i いイ	u うウ	e えエ	o おオ
ka かカ	ki きキ	ku くク	ke ケケ	ko こコ
ga がガ	gi ぎギ	gu ぐグ	ge ゲゲ	go ごゴ
sa さサ	shi しシ	su すス	se セセ	so そソ
za ざザ	ji じジ	zu ずズ	ze ぜゼ	zo ぞゾ
ta たタ	chi ちチ	tsu つツ	te てテ	to とト
da だダ	ji ぢヂ	zu づヅ	de でデ	do どド
na なナ	ni にニ	nu ぬヌ	ne ねネ	no のノ
ha はハ	hi ひヒ	fu ふフ	he へヘ	ho ほホ
ba ばバ	bi びビ	bu ぶブ	be べベ	bo ぼボ
pa ぱパ	pi ぴピ	pu ぷプ	pe ぺペ	po ぽポ
ma まマ	mi みミ	mu むム	me めメ	mo もモ
ya やヤ		yu ゆユ		yo よヨ
ra らラ	ri りリ	ru るル	re れレ	ro ろロ
wa わワ				o をヲ
va ヴァ	v ヴィ	vu ヴ	ve ヴェ	vo ヴォ

There are a few more variations to watch out for. Notables are the use of **ha** as the subject particle, in which case it's read **wa** (such as **watashi-wa** 私^{わたし}は), and verbs ending in **-masu** ^{ます}, which we've romanised to **-mas**, because that's how you say it. You'll pick them up as you go along.

BEING CHOOSY

There are plenty of phrases for which the Japanese have alternatives, as in any language. We've listed the phrases in a rough order from least to most casual, also getting more vulgar as they become more casual. If what you're saying doesn't seem to fit the mood, again, adapt to the speech of the people around you!

In the book, we've included the Japanese words for "me" and "you" in many phrases. In practice, they are often left out, unless particular clarification is needed, but until you can instinctively understand who is being referred to, it's best to use them. If you do, there are a range of words available, not just the gender-neutral **watashi** 私^{わたし} (with its super-formal counterpart **watakushi** 私^{わたくし}) and **anata** あなた that textbooks love.

For girls, there's **atashi** あたし, and for guys there's **boku** 僕 and **ore** 俺. To say "you," girls can say **anata** あなた or **anta** あんた, and guys can say **kimi** 君 or **omae** おまえ. In this book, we've stuck with **anata** and **kimi**, because these are the "safest" for everyday conversation. **Omae** and **ore** in particular are very harsh, and can put people off. Until you know when best to use these words (again judge by the speech of the Japanese around you), steer clear!

STRESSED OUT OVER ENDINGS

One thing that we have to say is that in Japanese, how you say something can have more meaning than what you say. Think about it: when you're sharing an intimate moment, you can convey many emotions by sounding caring and serious, on top

of what you're actually saying. Some phrases can be changed from statements to questions just by the tone or particle at the end... the list goes on. Here's a run-down of some slang endings and tonal tricks.

For starters, the rules say that plain negative verbs end in **-nai** (e.g. **wakaranai** 分からない I don't understand/know). But you'll hear other forms, like **-n**, as in **wakaran** 分からん, or **shiran** 知らん (I dunno) or special corruptions like **wakannai** 分かんない and **iu** 言う pronounced **yū** ゆう. (Plain positive forms generally don't change as they're pretty simple already).

The most common slang final particle is **ne**, often lengthened to **nē**. Only partly fictitious, it seems to us that when a new-born Japanese baby is shown off for the first time, someone will say **Kawaii-nē?** かわいいねえ? (Isn't he/she cute?), and inevitably the flock of admirers will all say **Nē!** ねえ! (Oh yes!). From such early exposure, the child is doomed to utter **nē** for the rest of his/her life.

Nē gives a familiar yet emphatic ending, usually to rhetorical questions, and lengthening it adds more emphasis. With a falling intonation it's more of an explanation. It isn't often said with a rising intonation, but can be said in a high pitch for emphasis. Girls prefer **ne** and **nē**, and guys have an alternative, **na**, which is used in the same way. But as we said before, the gender (speech) gap is narrowing, especially around women, guys will often use **ne**.

Other handy sentence endings include **yo** よ, used to emphasise that "I'm telling you what I think (and you should do this)." **Wa** わ is often added by women to soften phrases, and you'll see it throughout this book. If you prefer a more blunt style, don't use it, or use **yo** instead. **-noda** ~のだ (less formally **-nda** ~んだ) makes the sentence a clear explanation, with a feeling of "that's the way it is."

These can be combined liberally. For example, you're trying to decide which movie to see, and someone is being quite pushy about their choice. To be clear that you've already seen it and once was enough, you can say **Mō mitan-dayone** もう見たんだよね。

Zo ぞ and **ze** ぜ can be added (usually by guys) to give instructions. **Zo** means "let's do..." as in **Yoshi, iku-zo** よし、行くぞ (Right, let's go), similar to but slightly harsher than **ikō** 行こう. **Ze** is a very strong command form, e.g. **Iku-ze!** 行くぜ! (Move it!) Finally, **-kke** is a handy ending, expressing either uncertainty or forgetfulness **Nan-datta-kke?** 何だったっけ? (What was it again...?)

The meaning of some phrases may be changed from a statement to a question by a rising final intonation, and these phrases are marked by diamonds (♦). For example:

Haven't seen you around
for a while.

♦ **Hisashiburi-ne.** ♀
ひさしぶりね。

♦ **Hisashiburi-dane.**
ひさしぶりだね。

With a rising intonation, the sentence becomes "Haven't seen you around for a while, have I?"

And which parts of the phrase you stress also make a big difference—stressing a **yo** emphasizes that you're pushing your opinion. Stressing the **sō** in **sō-dane/sō desu-ne** そうだね/そうですね (that's right) means you agree more strongly.

Finally, put emotion into your voice. You might think that the Japanese spoken around you is emotionless because it seems so fast, but nothing could be further from the truth. Put feeling into your voice as you would in English, and your message will be loud and clear.

THE LAST WORD

Does all of this sound really daunting? It shouldn't! Think of this introduction as a reference page for your journey through the Japanese-speaking world. Just keep these points in mind, and you'll find this book a valuable resource to speed your street-Japanese skills along.

And there's one last thing: the Japanese love to see foreigners making an effort to speak Japanese! Through their troubles learning English, they know how hard it is, so even if you can't get the point across to start with, keep trying and you'll earn more respect. And if you're using real phrases like the ones in this book, all the better!

Getting to Know You

1

Hello! Hi!

Ohayō!

おはよう!

Konnichi-wa!

こんにちは!

Komban-wa!

こんばんは!

Ohayō! is used in the morning, say until 10A.M., and with people you're seeing for the first time that day. **Konnichi-wa!** is for the daytime, and **Komban-wa!** for the evening.

As everyday phrases, there are many variations and contractions of these, formal and informal, and they differ between regions of Japan—but these are the universal standards!

Hajimemashite

はじめまして。

This is a (somewhat formal) word you use to say hi to someone you haven't met before.

Allow us to introduce ourselves.

This is usually your first chance to practice katakana-ized pronunciation. It's sometimes a good idea to say your name in its original pronunciation first, and then in **katakana** form, which lets your new friend choose whether to try the "foreign version" or play safe with **katakana**—a choice they'll appreciate.

Where do you live?

Doko-ni sunderu-no?
どこに住んでるの？

Where do you come from?

Dokkara kita-no?
どこから来たの？

Doko-ni sunderu-no? should be used if you are introduced by someone. If there is no introduction, both **Doko-ni sunderu-no?** and **Dokkara kita-no?** are okay and both produce the same answer. Girls might tell you their address, or they may just say **acchi** あっち, meaning "over there."

The Japanese don't have a word for Britain—**Igrisu** is it, and the distinction between England, Great Britain and the U.K. is usually lost on the Japanese. Those wanting to emphasise their Scottish or Welsh background can substitute **Sukottorando** スコットランド or **Uēruzu** ウェールズ.

How old are you?

Nansai?
なんさい
何歳？

To this question, girls will usually answer with **Atete!**, **Nansai-da-to omou?** あてて！何歳だと思う？ "Guess! How old do you think I am?" or **Ikutsu-ni mieru?** いくつに見える？ "How old do I look?"

There are of course plenty of other socializing opportunities, with perhaps the most common being **karaoke**, shopping and relaxing at parks. Of course, there's also the option of clubbing, eating and drinking.

A casual evening or night out in Japan will often involve **karaoke**. **Karaoke** literally means "without orchestra," and this popular activity usually takes place in special **karaoke** bars, found throughout cities especially at major railway stations and entertainment areas. The "bars" are collections of many rooms, where you can sing, eat and drink in relative privacy.

The Japanese take their leisure very seriously.

**I/You forgot the chopsticks/ Ohashi/fōku/naifu/supūn
forks/knives/spoons. wasureta.**

お箸／フォーク／ナイフ／
スプーンを忘れた。

There are many rules governing the use of chopsticks. You shouldn't pass food from one set of chopsticks to another, because the Japanese place the ashes of their deceased into a funeral urn this way. It's also extremely offensive to stand chopsticks in a bowl of rice, as this is how food is offered to the spirits of the deceased. Plus, chopsticks should never be grasped in the fist as this is how they would be held for use as a weapon, and it is poor manners to lick them.

That said, once mastered, using chopsticks is second nature, and correct technique and etiquette can get you considerable admiration. If you don't know how, get your Japanese friends to teach you!

いただきます!

Almost every Japanese says this before eating. The closest English equivalent is "grace," but without its religious meaning (of receiving from the gods). Don't hesitate to say this, and you may even be complimented on your good manners!

**What do you think
(about this?)****(Kore-ni tsuite) dōmou?**
(これについて) どう思う?**Does this taste good?****Kore oishii?**

これおいしい?

It tastes good.**Oishii(!)**

おいしい (!)

Oishii is a grossly overused word, which can be voiced with the full gamut of emotions, from enthusiasm to indifference (meaning that it may not be good at all!). The Japanese indicate how they feel by the emotion they put into **oishii**. You can add other words, such as **kekkō oishii** 結構おいしい (it's really good, even without much enthusiasm), but just saying **oishii** and meaning it is usually enough.

It's an unusual taste.**Fushigi-na aji-dane.**

不思議な味だね。

It's OK/so-so.

Mā-mā.

まあまあ。

These two are also polite ways of saying you don't really like something. The following three phrases are also handy, but best left for eating out, where you won't be insulting anyone by criticizing the food!

It's not good.

You'll find that many (especially small) shops and restaurants in Japan don't take credit cards. This is because Japan is still a mainly cash-based economy. Though ATMs are common (for withdrawing cash and transferring money) in convenience stores, there's little point-of-sale use of cash cards and virtually no checks. People generally use cash for small purchases and bank transfers for larger ones.

Dō-shiyō-ka?
どうしようか。

Dō-shiyō-ka? is a classic case illustrating the vital role of pro-
nunciation. With a rising intonation (and preferably also an inter-
ested tone), it means "What sounds good?" But with a flat into-
nation and a concerned tone, it means "Now what the hell are
we going to do?" as when you've got a big problem on your hands.

The boy should make the decision so he doesn't seem weak.
The girl will most likely say **Wakannai** 分かんない ("I don't

Saying "love" in Japanese can be a bit tricky. **Ai** (愛) is the direct translation of "love," but it's generally only for movie titles or as a joke. In normal conversation, you usually say **suki** (好き) and convey the feeling of love by the emotion and emphasis in your voice.

I know what's on your
mind.

Beddo-in shiyō. ♂
ベッドインしよう。
(Kimi-to) beddo-in shitai

(君と) ベッドイン したい／

Beddo-in means "go to bed." Guys can add **ze** ぜ to the end of many phrases for more punch (though also more roughness, be careful). And this is sometimes used (among good friends) as a joke, so don't take it seriously every time!

Japanese do not often directly say "Let's go to bed." Instead the words are conveyed by the mood. These phrases are useful in case you miss the mood signals.

**Shall we go to a love
hotel?**

Rabu hoteru-ni ikō-ka?
ラブホテルに行こうか。
Rabu ho-ni ikō-ka?
ラブホに行こうか。

Young Japanese usually live with their parents right up to their wedding day. With small houses or apartments and paper-thin walls, the living arrangements are not conducive to good sex. Owning a car provides little escape, for there are few pleasant, obscure places to park short of driving two or three hours to the countryside. So, where do the non-farmers go for a roll in the hay? Have you heard of a love hotel? No? Then step this way...

Identifying a love hotel is easy, as most of them are near big train stations (four tracks or more), in entertainment districts, and along major highways.

They are usually well-lit with colorful Japanese characters or **rōmaji** in neon, or just a sign saying "Hotel," with some twinkling stars floating around it. If there are no obvious markings, look for

big, big objects on the roof. A 30-foot mock Statue of Liberty or Queen Elizabeth (the ship, that is) on top of a building that has no other visible ads or signs is a dead giveaway. Also, the absence of a doorman and a lobby with a front desk should scream love hotel.

The service at a love hotel is very discreet; you don't see them and they don't see you. ID's aren't even checked, as there's a rule of thumb: if you're old enough to pay, you're old enough to play.

Come closer to me.

Māne is often used to mean "I know." If said teasingly, it means "Yeah, I know (but I might not tell you)."

I made love.

Yacchatta.

やっちゃった。

This literally means "I did it"—you'll be clear by the context!

In Japanese there is a slang use of "A," "B," and "C" similar to the American English slang use of "first base," "second base," "third base," and "home run." These letters denote kissing, petting, and making love, respectively, so you could say **A shita** エーした etc.

I scored (with her).

Nampa-shita. ♂

なんぱした。

Nampa means "dishonest person" and the opposite, **kōha** こうは, means "honest person." A **nampa** might ask to make love on the first date, whereas a **kōha** might wait till their wedding night. In this context, **Nampa-shita** means "I went girl hunting (successfully)." This is a boy's phrase because only girls get nampa'd. (**Kōha-shita** doesn't mean anything.) A **nampa-yarō** is a boy who likes girl hunting.

The acceptance of cross-cultural marriages (*kokusai kekkon* 国際結婚) is growing amongst progressive-thinking Japanese. But there are still hardened attitudes against them out there, and some parents are more "protective" of their eldest son or daughter, whom they expect to be there for them when they get old. They might be scared that a foreigner would whisk their eldest away!

Typical jobs are **kaishain** 会社員, company worker; **sarariiman** サラリーマン, office worker; **ginkōin** 銀行員, banker. The answer will probably be something like one of the first two (vague)

replies. After that, it's (usually!) OK to ask what company he works for **Dokono kaisha de hataraite-maskā?** この会社で働いてますか? (to his face), but don't push regarding his position.

What's your mother's hobby/work?

Okāsan-no shumi/shigoto-wa nani?

お母さんの趣味/仕事は何?

Japan is still a very sexist society, and women's work is usually lower-ranking than men's. Typical jobs include OL, office lady; **shufu** 主婦, housewife and **arubaito** アルバイト part-time work. If the answer is **atashi OL desu** (I'm an OL-office lady), it's probably OK to ask what company she works for **Doko no kaisha de hataraite-maskā?** この会社で働いてますか? (to her face), but certainly don't ask for more information if she says **arubaito shitemas** アルバイトしてます。(I work part-time)—she may be embarrassed and prefer not to say.

When you're meeting your other half's parents for the first time, politeness is the key—the first impression is vital! Here are some ideas for things to say...

How should I address you? *Nante oyobi-shitara ii-deshō-ka?*
何てお呼びしたらいいでしょうか？

This is no laughing matter—in Japan, children generally call their parents and in-laws **otōsan** and **okāsan**—but preferences vary. Getting this wrong is a very quick way to put noses out of joint! If they prefer **otōsan** and **okāsan**, you can then use third-person polite phrases like **Okāsan-no shumi-wa nan desu-ka?** to their faces.

Where are you from? (*Otōsan/Okāsan-wa*) *Dochira-no goshusshin des-ka?*
(お父さん/お母さんは) どちらのご出身ですか。

This is a more formal and suitable question than **Dokkara kita-no?**, and unless they know you know a lot about Japan, the answer will probably not be too specific, e.g. **Kyōto no shusshin des.** 京都の出身です (I'm from Kyōto).

Aaah yes, I've been there. *Aa, sō des-ka. Watashi, itta-koto-ga arimasu.* ♀

ああ、そうですか。わたし、行ったことがあります。

Aa, sō des-ka. Boku, itta-koto-ga arimasu. ♂

Have you ever been to...? *...-he itta-koto-ga arimas-ka?*
...へ行ったことがありますか？

It's a very interesting/busy/pretty/green city/country, isn't it? *Totemo omoshiroi/nigiyakakirei/shizen-ga aru machi/tokoro des-ne.*

とても面白い/にぎやかな/きれいな/自然がある街/ところですね。

I played tennis while I was at school/university. *Kōkō/Daigaku-no koro tennis-o yarimashita.*
高校/大学の頃テニスをやりました。

I was in the local tennis club. *Komyuniti-no tennis kurabu-ni haitte-imashita.*

コミュニティーのテニスクラブに入っていました。

How much will the wedding cost? *Kekkon-shiki-no hiyō ikura gurai kakaru-no?*
結婚式の費用いくぐらいかかるの？

We have to hurry to have the wedding. *Isoide kekkon-shiki-o agenakucha.*
いそいで結婚式をあげなくちゃ。

We should begin preparing now. *Ima-kara yōi-shita-hō-ga ii.*
いまから用意した方がいい。

Should we have a Japanese or a Western-style wedding? *Seiyō-shiki-to Nihon-shiki, docchi-ni suru?*
西洋式と日本式、どっちにする？

What's the difference? *Nani-ga chigau-no?*
なにがちがうの？

Until recently, Japanese weddings followed a clear pattern. A Japanese-style wedding is performed by a **Shintō** しんとう priest, the bride and groom usually wear **kimono** 着物 and the guests are limited to family members. These days western-styled weddings are preferred.

Lovers' Arguments 11

It wasn't your day,
was it?

Kyō-wa tsuite-nakatta-nē?
今日はついてなかったねえ。

It's boring, isn't it?

Tsumannai-nē?
つまんないねえ。

Do you feel comfortable
in public with me?

*Atashi-to issho-ni dearuku-no
ki-ninaru? ♀*
あたしと一緒に歩くの気になる?

*Boku-to issho-ni dearuku-no
ki-ni naru? ♂*
僕と一緒に歩くの気になる?

I don't want you to get
hurt on my account.

*Atashi-no sei-de iya-na omoi
sasetakunai. ♀*
あたしのせいでいやな思いさせたくない。

*Boku-no sei-de iya-na omoi
sasetakunai. ♂*
僕のせいでいやな思いさせたくない。

Do you care what they
think?

Minna-ga dō omou-ka ki-ni naru?
皆がどう思うか気になる?

Don't let it bother you
(what others think).

*Hoka-no-hito-no-koto ki-ni
shinaide. ♀*
他の人のこと気にしないで。

*Hoka-no-hito-no-koto ki-ni
suruna-yo. ♂*
他の人のこと気にするなよ。

Don't be upset.

Okoranaideyo. ♀
怒らないでよ。
Okoruna-yo. ♂
怒るなよ。

Does your family know
about us?

*Anata-no kazoku atashitachi-
no-koto shitteru? ♀*
あなたの家族あたしたちのこと
知ってる?

*Kimi-no kazoku bokutachi-no-
koto shitteru? ♂*
君の家族僕たちのこと知ってる?

I told my family about
you.

*Kazoku-ni anata-no-koto
hanashita. ♀*
家族にあなたのこと話した。
*Kazoku-ni kimi-no-koto
hanashita. ♂*
家族に君のこと話した。

Do you think we should
see each other again?

*Atashitachi mata attara ii-to
omou? ♀*
あたしたちまた会ったらいいと
思う?

*Bokutachi mata attara ii-to
omou? ♂*
僕たちまた会ったらいいと思う?

Tell me, what do you
think?

Dō omou? Oshiete.
どう思う? 教えて。

Make it clear.

Hakkiri-shite.
はっきりして。

Please don't go.

Ikanaide.
行かないで。

You don't know.

Anata-wa shiranai to omou. ♀

あたしたち知り合ってから3か月
になるの(ね)。

Bokutachi shiriatte-kara sankaget-su-ni naru-nā/ne. ♂

僕たち知り合ってから3か月に
なるなあ／ね。

When saying this to someone else, say... **ni naru-nā**. To your partner, a final ne with a (slight) rising intonation is better.

We can make it work. Dō ni-ka naru-yo.
どうにかなるよ。

I want to know what you're feeling.

Anata-ga dō omotteru-ka shiritai. ♀

あなたがどう思ってるか知りたい。

君がどう思ってるか知りたい。

It'll all change.

Subete kawaru-yo.
すべて変わるよ。

Let's not get serious now. Ima maji-ni naru-no-wa yameyō.

いまじになるのは止めよう。

The use of "let's" here is very Japanese, as it invites the other party into the decision-making process, a part of the typical Japanese subtlety. Directly stating one's wishes will halve the normal runaround, but will put off those who prefer indirectness.

I don't want to get serious. Maji-ni naritakunai.
まじになりたくない。

I don't (even) want to think about it.

Kangae-taku(-mo) nai.
考えたく(も)ない。

This is a very strong phrase—use it with care!

What does that mean?

かなしまないで。

Cheer up.

Genki dashite.
元気出して。

Don't worry; be happy.

Shinpai-shinaide, genki dashite.
心配しないで、元気出して。

Let's talk about this later. Sono-koto-wa ato-de hanasō.
その事は後で話そう。

Let's change the subject. Chotto hanashi-ga kawaru kedo...

ちょっと話がかわるけど...

Hanashi-o kaeyō.
話を変えよう。

By the way,...

Tokoro-de,...
ところで...

It was silly of me (to do that).

Baka-na koto shita-nā.
ばかな事したなあ。

You have so much more than they do.

Anata-wa minna-ni nai mono-o motteru. ♀
あなたは皆にないものを持ってる。
Kimi-wa minna-ni nai mono-o motteru. ♂
君は皆にないものを持ってる。

If you change your mind, let me know.

あたしの気持ちも考えて。
Boku-no kimochi mo kangaete. ♂
僕の気持ちも考えて。

You didn't even listen to me.

Kiite-mo kurenakatta.
聞いてもくれなかった。

Let's get back together.

Nakanaori-shiyō.
仲直りしよう。

Promise it will never happen again.

Mō okoranai-tte yakusoku-shite.
もう怒らないって約束して。

I promise.

Yakusoku-suru.
約束する。

Please take me back.

Yori-o modoshite.
よりを戻して。
Yori-o modosō-yo.
よりを戻そうよ。

I'm always doing silly things.
